Overview of Hydro Data Expo

Robb Startzman
Division Director, Hydrology and Hydraulics

sfwmd.gov

Expo Objectives

To Explore

- **What is involved in producing hydro-meteorological data**
- **How we are continuously working to improve data quality**

Expo Consists of

Oral Presentations

Poster Presentations

Displays

Data Production Steps

Measurement & Collection

Transmission

Processing/ Initial QA/QC

Flow Computations

Streamgaging

Post Processing QA/QC

Storage and Retrieval

Measurement and Collection

Oral Presentations

- **Instrumentations, Installation, Measurements and Maintenance**
- **NEXRAD Rainfall Data**

Poster Presentations

- Loggernet Infrastructure
- MOSCAD Infrastructure
- Loggernet Data Collection Process
- SCADA Overview
- S5A Flow Proportional Sampler

Displays

- Weather Station
- MOSCAD Unit and Functionality

Data Production Steps

Measurement & Collection

Transmission

Processing/ Initial QA/QC

Flow Computations

Streamgaging

Post Processing QA/QC

Storage and Retrieval

Data Transmission

Oral Presentations

- **New Supervisory Control and Data Acquisition System**

- **The Telemetry Backbone – The Journey from the Field to the Front End Processor**

Poster Presentations

- **SFWMD Telemetry Network Infrastructure**

Data Production Steps

Measurement & Collection

Transmission

Processing/ Initial QA/QC

Flow Computations

Streamgaging

Post Processing QA/QC

Storage and Retrieval

# Data Processing and Initial QA/QC

Oral Presentations

- Initial Data Processing and QA/QC Workflow

Poster Presentations

- Data Process Flow

- Hydrology and Hydraulics Productivity

- Hydrologic Data Processing Quality Improvement Team

Data Production Steps

Measurement & Collection

Transmission

Processing/ Initial QA/QC

Flow Computations

Streamgaging

Post Processing QA/QC

Storage and Retrieval

Flow Computations

Oral Presentations

- **Flow Rating Development and Calibration; Flow Computations**

- **Flow Data Quality Improvement**

- **Structure Information Verification (STRIVE)**

Poster Presentations

- **Flow Monitoring at Pump Stations: Opportunities and Challenges**

- **One Flow Initiative**

- **Estuary Flow Measurement**

- **NexFlow**

- **Flow Measurements and Instrumentations at Culverts**

Figure 1: Western C-11 Basin Water Pumping Station S-9A Pumps 1 and 4 (Diesel) Pump Curve Polynomial of Type 6 fitted to the manufacturer's data Streamgauging data shown for comparison

# Streamgaging

Oral Presentations

- **Field Flow Measurements/ Streamgaging**

Poster Presentations

- **RoboBoat**
- **Field Flow Measurement Equipment**

Displays

- **Streamgaging Instruments**
- **RoboBoat**

Post Processing QA/QC

Oral Presentations

- Post Processing QA/QC and Preferred Data Sets
- Data Change Procedures

Poster Presentations

- Post-Processing QA/QC of Hydro-Meteorological Data
- Data Anomaly at S18C Identified and Corrected from QA/QC
- Flow Estimation and Data Change Procedures

Data Production Steps

Measurement & Collection

Transmission

Processing/ Initial QA/QC

Flow Computations

Streamgaging

Post Processing QA/QC

Storage and Retrieval

Others

Poster Presentations

- **Active Monitoring Sites for Flow**
- **Active Monitoring Sites for Stage**
- **Active Monitoring Sites for Rain**
- **Active Monitoring Sties for Groundwater**
- **Active Monitoring Sites for Weather Stations**

Questions?
